

Job Title: Software Engineering Intern - Cloud and AI

Company: Microsoft Corporation

Location: Redmond, WA (Hybrid - 3 days in office)

Compensation: \$55.00 - \$62.00 per hour plus housing stipend

Duration: 12 weeks (May 2025 - August 2025)

Application Deadline: December 1, 2024

Job Overview:

Join Microsoft Azure AI to build next-generation large language model infrastructure and cloud microservices.

Required Qualifications:

- Pursuing Bachelor of Science or Master of Science in Computer Science or related STEM field
- Proficiency in C#, C++, Python, or Rust
- Strong foundation in algorithms, data structures, and distributed systems
- Experience with Git version control and Linux environments
- Authorized to work in the US without visa restrictions

Preferred Qualifications:

- Familiarity with Azure cloud services, Docker, or Kubernetes
- Experience with PyTorch, LangChain, or machine learning frameworks
- Previous internship in backend or cloud software engineering
- Experience with RESTful APIs, gRPC, and relational databases (SQL)
